Continuation of 3. NOTE: The amendments to independent claims 1, 13, 14, and 16 change the scope of the claims and would require further consideration and/or search.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant provides the same general arguments as were provided in the remarks dated 8/12/2008, already responded to in the final office action dated 11/18/2008. Applicant has changed this argument in 1 aspect, however, in that Applicant argues that "Naor merely teaches that the CRL is not used when (i) the time stamp is older than a current time stamp or (ii)) the expiration period of expired". As explicitly pointed out in a citation cited in the final office action, "certificates are marked by a serial number instead of an expiration date." One can clearly see that the serial number is used here. Applicant argues, with respect to claim 8, that Naor fails to disclose or suggest updating a revocation number to a number that is larger than an identification number of a server certificate to be revoked and issuing a new server certificate including an identification number indicating a value that is equal to or larger than the revocation number. The pertinent portion reads "Kaufman et al. [15, Section 7.7.3] suggested reissuing all certificates whenever the CRL grows beyond some limit. In their proposal, certificates are marked by a serial number instead of an expiration date. (Serial numbers are incremented for each issues certificate. Serial numbers are not reused even when all certificates are reissued.) The CRL contains a field indicating the first valid certificate. When all certificates are reissued, the CRL first valid certificate field is updated to contain the serial number of the first reissued certificate." One can clearly see here an identification number (serial number) that is compared against a first valid certificate (revocation number), wherein IDs smaller than the first valid certificate are invalid/revoked/non-reissued, and IDs equal to or larger than the first valid certificate are valid. One can further see the reissuance of valid certificates, wehrein such reissued certificates contain serial numbers equal
